State Contract # 986739 Goldstrike Reclamation and Monitoring

Correspondence with BLM and DWR

Doug, I went out to the mine site early this morning. The rain gauge at Guzzler # 2 showed .80 inches of rain. It was probably from a storm last Saturday or Thursday. The guzzlers were both 1 inch from being full. The only birds I saw were at the top of the canyon, where I saw 6

0005

Chukers.

The heap off-flow was about 4.0 GPM. The 18 cows I saw last month were gone. I believe they are still on the property as they are drinking at the land application area. Dave Cory with the BLM had given the local rancher permission to run up to 20 head on the mine site. I don't have a problem with that if you don't. Dave was at the site last week to check on the vegetation and he didn't see the cows either.

The back gate was closed. It didn't appear that the site has had much traffic lately; most likely because of the hot temperatures.

The East Fork near Forbes cabin and at the Slaughter Creek road was dry.

That's all for this month-

Dan Slyter
